## Regional Europe for Citizens Forum 2012

*Varaždin, Croatia, 15-16 November 2012*

### Compendium

This event is co-financed with the support of Europe for Citizens Programme of the European Union

## **Regional Europe for Citizens Forum 2012**

The aim of the Regional Europe for Citizens Forum held on 15<sup>th</sup> and 16<sup>th</sup> of November 2012 in Hotel Turist, Varaždin, Croatia was to provide a platform for forming partnerships and developing project ideas. Forum participants - representatives of civil society and local administrations from Bosnia and Herzegovina, Slovenia, Austria, Hungary and Croatia had the time for creative formation of potential partners' project ideas – future Europe for Citizens project proposals.

Regional Europe for Citizens Forum 2012 supported and encouraged civil initiative and participation in local communities through regional partnerships supported by the Europe for Citizens Programme with focus on the year 2013, as the “European Year of Citizens”.

The conference structure was based on Open Space Technology without pre-determined agenda, only the highly interactive framework. This framework was not intended to tell people what to do and when. It made possible to create a supportive environment in which all the participants actively participated and gave their contribution in forming partnerships and developing project ideas.

The goal of an Open Space Technology was to create time and space for participants to engage deeply and creatively around project ideas of concern to them. The agenda of the Regional Europe for Citizens Forum 2012 was set by participants with the power and desire to see it through.

Forum gathered 86 participants coming from Bosnia and Herzegovina, Austria, Hungary, Serbia and Croatia. Participants addressed 23 themes on the agenda and they have developed 23 project ideas working in small groups in simultaneous time sessions during the two days conference.

All participants during the Forum followed the basic principle - everyone who comes to an Open Space conference must be passionate about the topic and willing to take some responsibility for creating things out of that passion.

All the project ideas developed by the participants are presented in appendix with the intent to share and further develop newly established partnerships and common ideas among participants of the Regional Europe for Citizens Forum 2012.

## Project ideas from Open Space

This is the overview of all project ideas discussed during Open Space sessions. Below are transcription of the session reports done in form of big flipchart papers and posted in gallery manner for additional networking and information sharing during convergence of Open Space. They provide brief overview of key elements of project ideas in original format as set by the participants. The level of details and additional information like invitation to join the project or to contact caller of the project are written as it has been done by session host, with minimal adaption to the given report format.
